★ All appliance prices quoted are inclusive of records and one set of standard removable clear (Essix) retainers.

On occasion, the fees quoted may vary depending on the complexity of your case. Other essential additional procedures (e.g., extractions, implants, surgery, cosmetic procedures) performed by other dentists or specialists may be required to successfully complete orthodontic treatment. Such procedures will be charged separately by the relevant clinician.

Fees for patients who have started treatment elsewhere but would like to continue their treatment here (transfer cases) will be calculated as a proportion of the above fees, based on an estimate of the remaining treatment duration and the type of work involved.

★ Bonded retainer repairs are for patients outside of the 2-year retention period or who present with an existing broken bonded retainer.

★ **A 5% discount is available if fees are settled from the outset of treatment.**
